

# G32A mutation · Synaptic ribosomes nested in broader cytoplasmic ribosome

## Gene rings

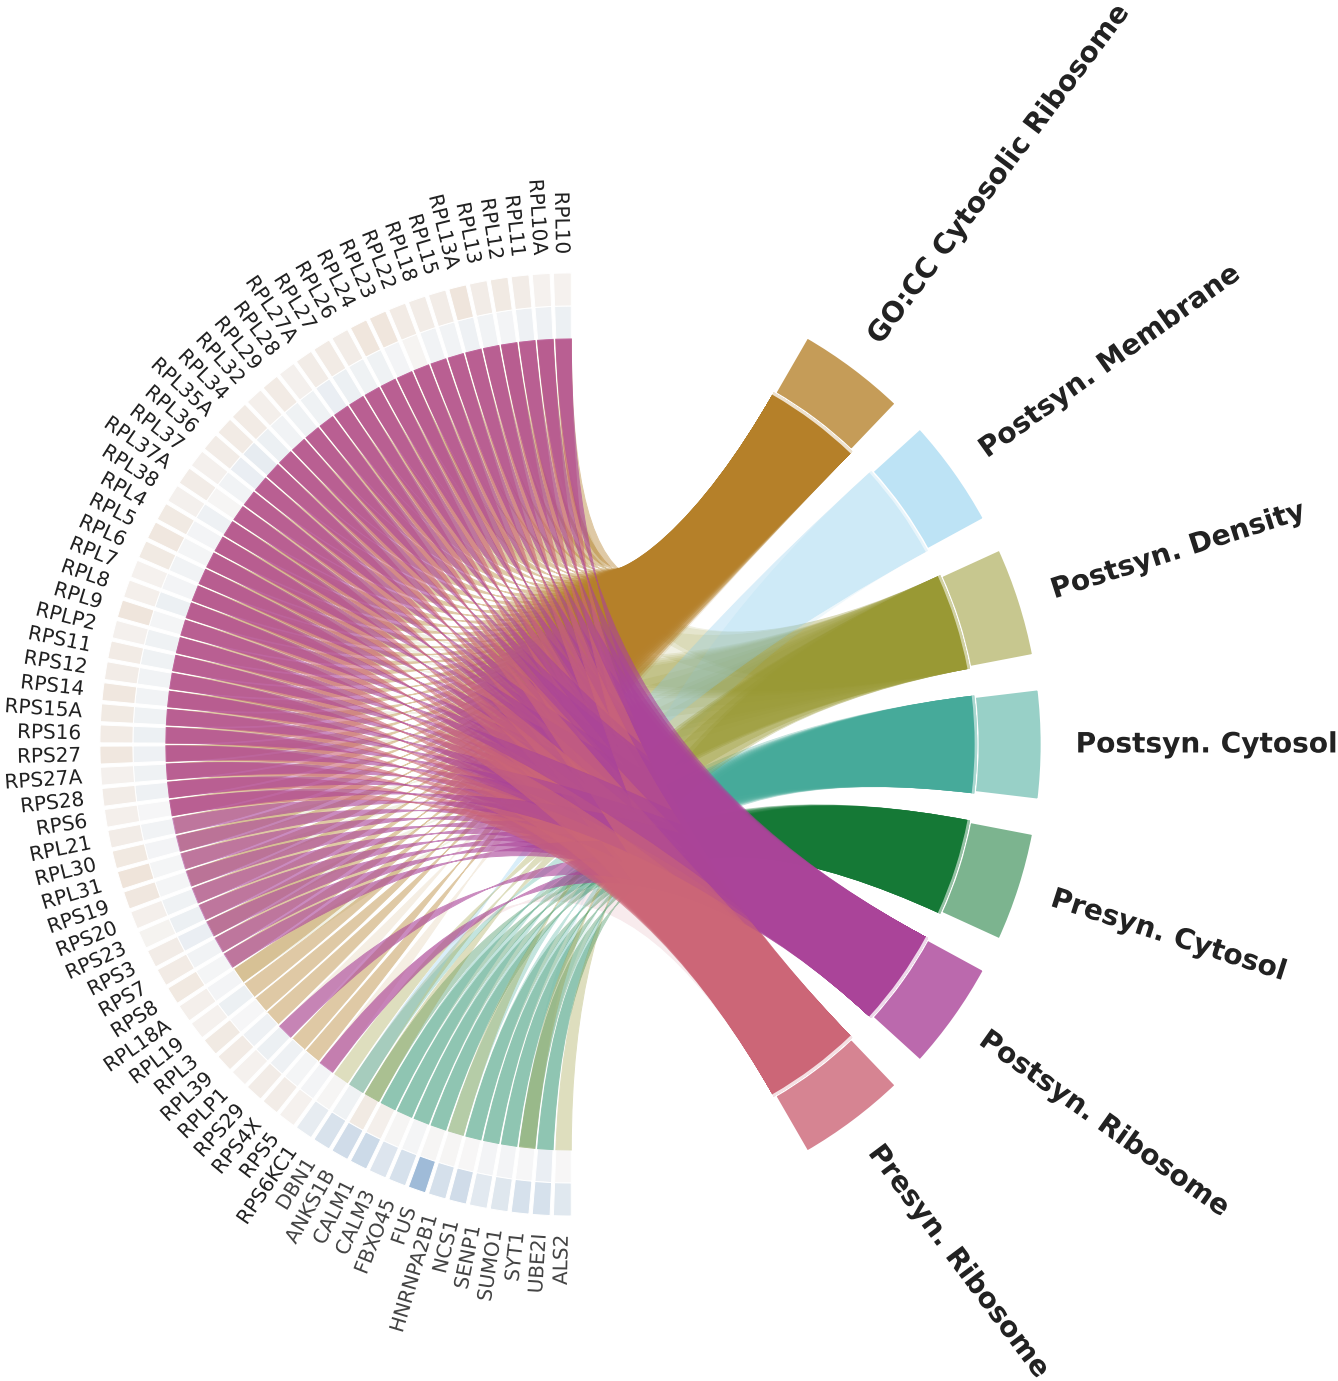

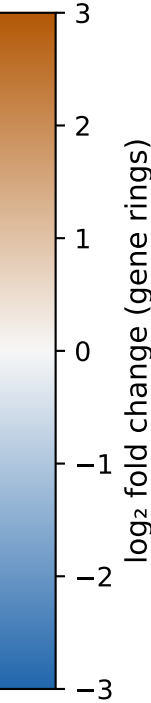

Outer ring = D35

Inner ring = D65

Concentric reading:  
outer → inner = early → late

## Ribbons

- GSEA leading edge (this contrast)
- Gene-set annotation (not in leading edge)

## Pathways

### SynGO synaptic-localized

- Presyn. Ribosome
- Postsyn. Ribosome
- Presyn. Cytosol
- Postsyn. Cytosol
- Postsyn. Density
- Postsyn. Membrane

### Broader cytoplasmic ribosome / translation

- GO:CC Cytosolic Ribosome
