

R403C mutation · Synaptic ribosomes within broader cytoplasmic translation program

Gene rings

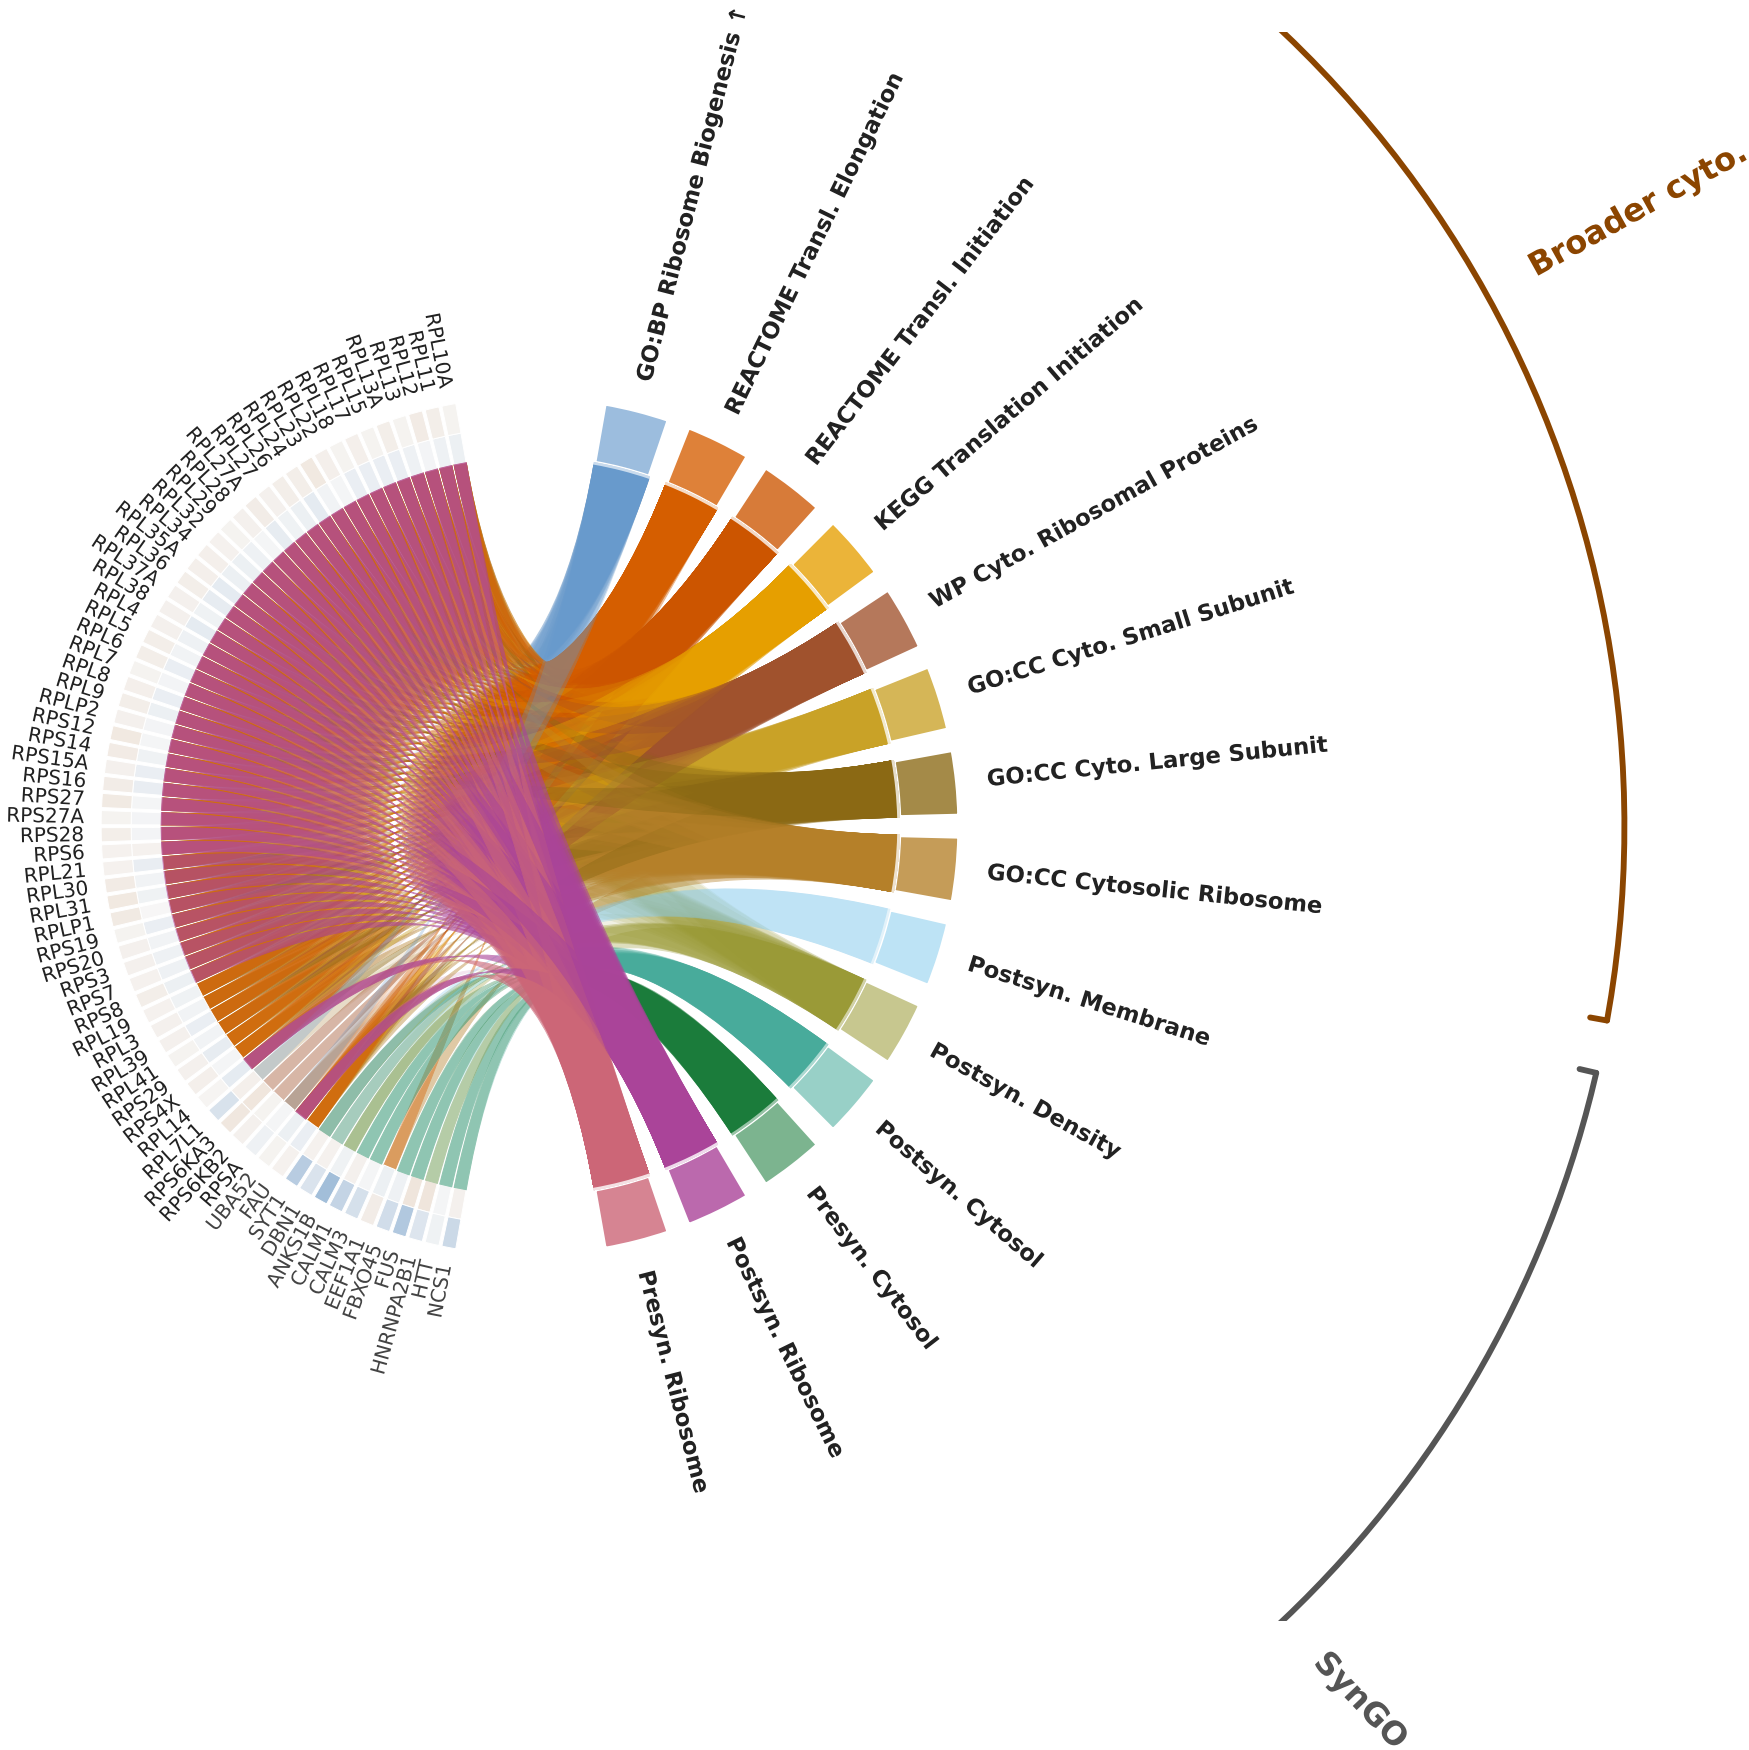

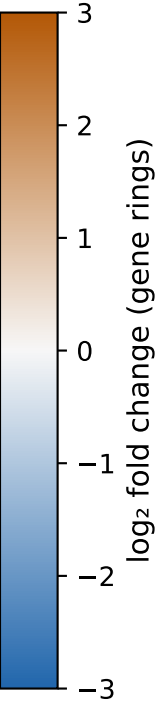

Outer ring = D35

Inner ring = D65

Concentric reading:
outer → inner = early → late

Ribbons

- GSEA leading edge (this contrast)
- Gene-set annotation (not in leading edge)

Pathways

SynGO synaptic-localized

- Presyn. Ribosome
- Postsyn. Ribosome
- Presyn. Cytosol
- Postsyn. Cytosol
- Postsyn. Density
- Postsyn. Membrane

Broader cytoplasmic ribosome / translation

- GO:CC Cytosolic Ribosome
- GO:CC Cyto. Large Subunit
- GO:CC Cyto. Small Subunit
- WP Cyto. Ribosomal Proteins
- KEGG Translation Initiation
- REACTOME Transl. Initiation
- REACTOME Transl. Elongation

Biogenesis (counter-direction)

- GO:BP Ribosome Biogenesis ↑
